14 September 1964

Dear Jack,

The attached abstract is the only reference available in the literature to some work which has been done by Armour Research Foundation. I have spoken with these people on the phone and find that the only way we can get information would be to obtain the contract reports. Would you, therefore, attempt to obtain all reports from the Navy Bureau of Aeronautics under Contract NOas 56-934C. This information will be quite helpful on problems of mutual interest.

Best regards

*Milt*
